ABSTRACT.

This thesis explores the relationship between physicians' clinical and educational roles in the context of UK General Practice (GP) education by investigating the experiences of seven GP trainers through an ethnographic approach employing Activity Theory (AT). The Introduction considers the philosophy and structures of GP education and outlines the author's professional biography to provide context. The Literature Review focusses on the development of medical education as a discrete field and identity formation in medical educators, concluding that: specialist medical educators are a relatively new group; and there is a paucity of knowledge regarding the impact on physicians of occupying dual clinical and educational roles. The thesis then focusses on three Research Questions (RQs), namely:

1. What is the impact of GP trainers' clinical practice upon their educational work?
2. How does GP trainers' educational practice influence their clinical work?
3. What are the social contexts for GP trainers' clinical and educational practice?

These questions are addressed within a pragmatic theoretical framework to build up an ethnographic description of the participants' experiences. Data collection is through semi-structured interviews and observation of video-recorded teaching. Ethical issues associated with the study are discussed in detail, in particular the challenges of "insider" research. Four approaches are used for data analysis: global impressions; word cloud analysis; thematic analysis; and analysis shaped by AT.

In answer to RQs 1 and 2, the study finds that GP trainers experience their dual roles as intimately linked, intuitively transferring their skills between their clinical and educational practice. The study also finds that GP trainers reconstruct their professional identities through teaching. With regard to RQ 3, engaging in teaching can lead to internal conflict for GP trainers and tensions with their colleagues, trainees and regulators. These findings are discussed in relation to medical education research methodology and the impact the study on the researcher is explored. The thesis closes by considering the conflicted position the participants occupy, concluding that teaching offers physicians the opportunity to reconstruct their professional identities so they can approach tensions in their practice with a sense of agency and optimism.

LIST OF CONTENTS.

Section	Page
Title Pages	1
Abstract	3
Acknowledgements	4
Contents	5
Lists of Figures and Tables	8
Abbreviations	9
Chapter 1: Introduction	
1.1 The Subject of this Thesis and Introduction to the Chapter	10
1.2 A Brief History of General Practice in the United Kingdom	11
1.3 General Practice Education - Philosophies and Structures	13
1.4 The Nature of Educational Research in Medicine	19
1.5 My Educational and Professional Biography	24
1.6 Structure of the Thesis	28
1.7 Summary of the Chapter	28
Chapter 2: Literature Review	
2.1 Introduction to the Chapter	29
2.2 Literature Search Strategy	30
2.3 The Emergence of the Professional Medical Educator	32
2.4 Identity Formation in Medical Educators	35
2.5 The Development of GP Training and GP Trainers	38
2.6 The Relationship between Medical Educators' Clinical and Teaching Roles	41
2.7 Conclusions of the Chapter and Research Questions	44
Chapter 3: Theoretical Framework & Methodology	
3.1 Introduction to the Chapter	46
3.2 Ways of Knowing - The Nature of Reality	47
3.3 Theoretical Perspectives - Positivism and Alternative Views	49

Section	Page
3.4 From Nothing to Something?	54
3.5 What is Pragmatism?	55
3.6 Deweyian Pragmatism - Beyond Epistemology	58
3.7 The Ethnographic Approach	62
3.8 Conclusions of the Chapter	66
Chapter 4: Data Collection & Analytical Framework	
4.1 Introduction to the Chapter	67
4.2 A Form of Methodological Triangulation	67
4.3 Data Collection Methods in Ethnography	70
4.4 Interviews - Theoretical Issues	73
4.5 Interviews - Technical Questions	75
4.6 Observational Methods	81
4.7 Analytical Framework	85
4.8 Activity Theory	91
4.9 Summary of the Chapter	97
Chapter 5: Ethics	
5.1 Introduction to the Chapter	98
5.2 Ethical Frameworks	98
5.3 Ethics in Educational Research	102
5.4 Ethical Challenges in this Thesis	104
5.5 Summary and Conclusions	111
Chapter 6: Findings Part I	
6.1 Introduction to the Chapter	112
6.2 Interview Data - General Comments	112
6.3 Global Impressions	114
6.4 Word Cloud Analysis	124
6.5 Thematic Analysis	131
Chapter 7: Findings Part II - Activity Theory Analysis	
7.1 Constructing the Activity Systems	151

Section	Page
7.2 Participants' Activity Systems	153
7.3 Summary of Activity Systems	163
7.4 The Value of Observational Data in Constructing Activity Systems	167
7.5 Summary of Chapter	168
Chapter 8: Discussion	
8.1 Introduction to the Chapter	170
8.2 Methodological Issues	171
8.3 Research Findings - The Relationship Between Clinical and Educational Practice	182
8.4 The Researcher's Journey - A Search for Authenticity	189
8.5 Next Steps	192
Chapter 9: Conclusions	
Conclusion 1: GP Trainers Occupy a Conflicted Position in Their Dual Roles as Physicians and Educators	193
Conclusion 2: GP Trainers Reconstruct their Professional Identities Through Teaching	195
Conclusion 3: What Constitutes "Good" GP Education is a Source of Tension Between Trainers and Trainees	196
